

# **Yerevan energy storage power plant address query**

## Overview

---

Old thermal plant The Teploelectroproject Institute began planning the Yerevan Thermal Power Plant in 1959. Construction began in 1961, and 1963 saw the commission of the first turbine, with 50 megawatts of electrical capacity. (The operating company was established at the same time.) It was the first.

Yerevan Thermal Power Plant (Yerevan TPP) (: Երևանի ջերմաէլեկտրակայան (Երևանի ՋԷԿ)), is a located about 10 kilometres (6.2 mi) from , . An older, obsolete plant.

The old plant, which consisted of seven units, had 550 megawatts of electrical power and 630 GCal/h of thermal capacity. It included two K-150-130.

Where is Yerevan thermal power plant located?

Yerevan Thermal Power Plant (Yerevan TPP) (Armenian: Երևանի ջերմաէլեկտրակայան (Երևանի ՋԷԿ)), is a thermal power plant located about 10 kilometres (6.2 mi) from Yerevan, Armenia. An older, obsolete plant was fueled by natural gas and fuel oil, while the new combined-cycle plant is powered by natural gas and has a capacity of 242 megawatts.

Does Armenia's new power plant use more natural gas?

Compared with the traditional thermal power plants being operated in Armenia the new power unit consumes about twice as less fuel (natural gas) for generation of one kWh of electricity. Taking into account the continuous rising of the natural gas price, the significance of this fact becomes determinant.

Who is the consultant for Yerevan combined cycle co-generation power plant (yccpp)?

The Japanese “Tokyo Electric Power Service Co., Ltd” (TEPSCO) was selected as Consultant for implementation of the Yerevan Combined Cycle Co-generation Power Plant (YCCPP) project. This company had an extensive experience for construction of similar power plants abroad.
