

# Zambia s energy storage peak-shaving policy

## Overview

---

How much does peak shaving cost in Zambia?

Results of the business case for peak shaving Zambia, between USD 500/kWh and USD 1,000/ kWh. With 3,650 kWh stored during the lifetime of the system, we can compute a cost of storage of USD 0.14/kWh and USD 0.27/kWh.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

What is Zambia's economic policy?

The government's economic policy focused on securing the USD 1.3 billion IMF Extended Credit Facility (ECF) programme and a debt-restructuring agreement with Zambia's various creditors. With the inflation rate at 22% at the end of 2021 and the local currency appreciation, there was still the risk of a balance-of-payments crisis and a debt crisis.

Will Zambia increase its solar power capacity by 2030?

The Zambian government has set a target to increase its installed solar and wind capacity to 600 MW by 2030. However, the current installed capacity for solar photovoltaics is only 90 MWp, indicating significant underutilisation of Zambia's potential in the renewable energy sector.

How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.

What does the Electricity Act do in Zambia?

The Electricity Act regulates the generation, trans-mission, distribution and supply of electricity to enhance the security and reliability of electricity supply in Zambia. It codifies the rules on tariff setting and introduces the concept of intermediary power trading, a concept that was missing from the previous regulatory framework.
